

EDUCATION

NORTHEASTERN UNIVERSITY

M.S. Candidate in Mechanical Engineering, Concentration in Mechatronics, GPA: 3.84

B.S. in Mechanical Engineering, Minor in Computer Science, GPA: 3.73

Boston, MA

June 2025 - April 2026

Sep. 2021 - April 2025

SKILLS

DESIGN & ANALYSIS: Creo, SolidWorks, AutoCAD, MATLAB, ANSYS (Static Structural), Abaqus**PROGRAMMING & DATA:** C++, Python, SQL, JavaScript, Azure, Microsoft Office (Word, PowerPoint, Excel), Power BI, Minitab**MANUFACTURING & METHODS:** 3D Printing (FDM, LCD Resin), Agile, Scrum

WORK EXPERIENCE

AMETEK - FARO TECHNOLOGIES | *Product Development Engineering Intern*

Exton, PA | May 2025 - Aug. 2025

- Spearheaded data analysis on metrology systems using custom Python scripts to assess accuracy at the microradian level, uncovering trends to inform stability improvements.
- Executed prototype assembly, diagnosing and resolving electrical and mechanical issues to enable testing.
- Designed and fabricated 3D printed prototype components, accelerating design iteration cycles and prototype evaluations.
- Authored and processed Engineering Change orders to resolve production and supply chain issues.

VERIZON | *5G Engineering Co-op*

Bedminster, NJ | Jan. 2024 - June 2024

- Led reliability and performance testing on 7 flagship 5G devices; identified and resolved critical issues before release, preventing customer impact and ensuring compliance with carrier standards.
- Engineered fully redundant lab network configuration, boosting system uptime and streamlining future maintenance.
- Managed the lab's 3D printer operations, designing and fabricating custom test fixtures; trained 15+ engineers on CAD and additive manufacturing, improving lab capabilities.
- Recognized by management with multiple commendations for communication, technical contributions, and teamwork.

HANDSFREE HEALTH | *Information Technology Intern*

Wayne, PA | May 2022 - Aug. 2022, July 2023 - Aug. 2023

- Expanded automated test suites for mobile, device, API, and internal tools, increasing test coverage and cutting manual testing time to accelerate release cycles.
- Improved system stability by developing unit tests in C#/.NET, raising code coverage and reducing software defects.
- Upgraded firmware and device software for 5,000+ users, supporting large scale tenant migration with minimal downtime.

JOHNSON & JOHNSON - DEPUY SYNTHES | *Product Development Co-op*

West Chester, PA | Jan. 2023 - July 2023

- Designed and prototyped innovative orthopedic surgical instruments, integrating surgeon feedback to enhance usability and ergonomics; earned an award for outstanding contributions.
- Performed strength and safety testing on 15+ devices, designing test fixtures and authoring detailed validation reports to support FDA compliance.
- Created reference guide on 3D printed and machined materials, improving prototyping decisions for hundreds of employees.
- Led the Intern and Co-op Association and organized career enrichment events for 15+ members.

NORTHEASTERN UNIVERSITY | *Course Assistant*

Boston, MA | Mar. 2022 - Dec. 2024

- Demonstrated and taught state of the art Industry 4.0 equipment to 50+ students, with a focus on product design and prototyping, programming and control of industrial machinery, and integrated factory automation.
- Trained students in utilizing a Manufacturing Execution System (MES), AS/RS, Automated Guided Vehicle (AGV), Human-Machine Interface (HMI), program Programmable Logic Controllers with Siemens TIA portal, as well as additive and subtractive manufacturing.

PROJECT EXPERIENCE

ENHANCED BUG CATCHER | *Senior Engineering Project*

Boston, MA | July 2024 - Dec. 2024

- Designed and developed a bug catching device with vacuum technology, awarded "Best Iterative Design" at Northeastern University's Engineering Showcase.
- Led electronic subsystem design, programming microcontroller and integrating key components for seamless operation.
- Managed 100+ part SolidWorks assembly, performing stress analysis and hardware sourcing to meet design specifications.

WEBSITE CREATION | *Independent Venture*

Chester Springs, PA | July 2023 - Present

- Designed and deployed a responsive portfolio website in React, showcasing technical projects and skills.
- Conducted comprehensive testing and debugging, ensuring a smooth and professional user experience.
